Figure 2 Cutaway Drawing

1. Give the drawing a clear title and a figure number (if figure numbers are used), both of which should be centered below the drawing.
2. Place the source or courtesy line, if necessary, in the lower left corner.
3. Show the equipment from the point of view of the person who will use it.
4. When illustrating a subsystem, show its relationship to the larger system of which it is a part.
5. Draw the different parts of an object in proportion to one another, unless you indicate that certain parts are enlarged.
6. When a sequence of drawings is used to illustrate a process, arrange them from left to right or from top to bottom.
7. Label parts in the drawing so that text references to them are clear.
