PROJECTS

Simple 3D engine from scratch (Personal)   **2019**

- Built a simple 3D engine in C++ and Java from scratch
- Involved a lot of mathematics such as: Vector operations, Matrix operations, Matrix multiplications, Vector projections, sorting.
- The engine could display simple 3D shapes such as cubes or obj files to the screen.

Core Competencies: Core Matrix and Vector manipulations, Understanding computer graphics and 3D rendering

2D GUI sudoku solver (Personal)   **2019**
Concordia University, Montreal, QC

- Building a Graphical user interface of a Sudoku board solver
- Understanding a lot of computer science aspects such as: Recursion, Backtracking algorithm, Dealing with 2D graphics
  Core Competencies: Critical thinking, Problem analysis, Algorithm design and knowledge

2D HTML canvas game (Personal)   **2018**

- Built a 2D game using HTML5, CSS and JavaScript
- Involved a fair amount of mathematics such as: Collision detection
- Involved a lot of client-side programming such as: Dealing with DOM elements, Dealing with 2D graphics rendering, Deep knowledge in object-oriented programming.
- Involved a lot of server-side programming such as: Sockets sending and handling, Saving to databases with NodeJS

VOLUNTEER WORK

Library Organizer   **August 2015-April 2016**
Public library, Contrecœur, QC

- Helped improving book searching and sorting in the public library of Contrecœur

INTERESTS

Reading	Physics, math and programming books
Sports	Soccer, badminton
Passions	Gaming, programming, physics
